### CONCURRENCE ON DRAFT FINAL REMEDIAL ACTION SUMMARY REPORT FOR SITE SS015, TRAVIS AIR FORCE BASE (AFB), SOLANO COUNTY

Dear Mr. Smith:

The Department of Toxic Substances Control (DTSC) has reviewed the Draft Final Remedial Action Report for Soil Remedial Action at Site SS015, dated December 2003. The Report summarizes the remedial actions that took place between June 16, 2003, and July 24, 2003. The remediation work was conducted pursuant to the Remedial Action Workplan (RAW) for Site SS015. The selected remedy in the RAW for Site SS015 was Excavation and On-Base Consolidation at the Consolidation Unit (CU).

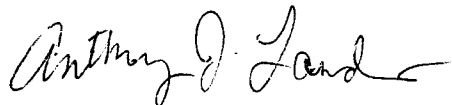

Site SS015 consisted of two areas; Building 550, the Hazardous Waste Accumulation Facility (HWAF) and Building 808, the Oil/Water Separator (OWS) Area. The HWAF was contaminated with metals and the OWS Area was contaminated with Polycyclic Aromatic Hydrocarbons. The RAW proposed industrial cleanup levels for Site SS015. Approximately 227 cubic yards of excavated soil with contaminant concentrations below the CU acceptance criteria were transported to the CU for subsequent consolidation.

DTSC concurs that the soil remedial action at Site SS015 is complete and the property is available for industrial land reuse. Land use controls to assure incompatible uses are
